Manan Patel

Software Engineer | Applied AI & Machine Learning
manan.patel@outlook.com | mananpatel.info

Summary

Senior Software Engineer with 8+ years building production mobile and software applications serving millions of users across government, fintech, and startup environments. Expert in iOS development (Swift, SwiftUI, UIKit), cross-platform development (React Native), and full-stack engineering. Proficient in Python for backend services and ML model training, with hands-on AWS experience deploying infrastructure, APIs, and web applications. Academic background in Statistical Machine Learning including neural networks, backpropagation, multivariate analysis, and statistical inference. Proven track record in team leadership, product management, and agile development.

Professional Experience

Rocket Agency **Calgary, AB (Hybrid)**
AI Deployment Strategist (Consulting, Part-Time) *Aug 2025 - Present*

- Built, deployed, and operate production voice and chat LLM agents for SMB clients, autonomously resolving 60% of inbound call and support ticket volume (real estate bookings, restaurant reservations)
- Shipped AI agent systems across client SaaS stacks including Zendesk, Gorgias, HubSpot, Monday.com, and Shopify, automating support triage, sales follow-up, and order workflows via REST APIs and webhooks
- Own the full deployment lifecycle: agent design, tool and API integration, rollout to live customer traffic, and ongoing monitoring of resolution and escalation rates
- Built internal tools and full-stack web applications in Python, Node.js, and React to automate client workflows

Environment and Climate Change Canada **Calgary, AB (Remote)**
Software Engineer (Contract, Full-Time) *Mar 2023 - Present*

- Engineer for WeatherCAN, the #3 weather app in Canada, serving 5M+ monthly active users
- Lead a team of 4 engineers delivering weather dissemination modernization KPIs across Weather.gc.ca, iOS, and Android
- Build full-stack features across the iOS app and Node.js/Python backend services for real-time weather data, including GPS severe-weather alerting with radar, lightning, and tornado tracking
- Drive CI/CD, automated testing, and code review standards for well-structured, tested code across the team

RentPlay **Calgary, AB**
Co-Founder & Chief Technology Officer *Jan 2025 - Sep 2025*

- Co-founded a fintech rewards startup where members earn points for paying rent and bills by debit card and redeem them at local merchants; grew it from a winning hackathon project into a funded company
- Raised $100K in pre-seed funding ($90K from outside investors, $10K founder capital) plus a Platform Calgary grant
- Completed the Platform Calgary Incubator and the Alberta Catalyzer Traction program; defined the ideal customer profile (ICP), built the sales pipeline and outreach strategy, and led go-to-market (GTM) messaging and investor pitching
- Primary developer of the website, iOS app, and backend, architected on React Native, Node.js (Express), and TypeScript with MongoDB, PostgreSQL, and CI/CD; scaled to 1,000+ users and 100 merchants
- Built an automated receipt OCR pipeline that extracts and verifies purchase data for receipt-to-cash rewards
- Integrated Plaid for bank account linking and debit-card transaction data, secured with OAuth 2.0 and multi-factor authentication; built location-based merchant notifications and two-sided member–merchant matching

Wattpad **Toronto, ON (Remote)**
iOS Engineer *Aug 2021 - Mar 2023*

– Lead engineer for the new Wattpad Comments experience on an app serving 90M+ users, delivering a 300% engagement increase

– Managed bi-monthly releases at 99.9% crash-free rate; conducted 100+ code reviews enforcing quality standards

TD **Toronto, ON (Hybrid)**
iOS Developer *Jan 2020 - Aug 2021*

– Built app features for account management, fund transfers, and transaction history

– Integrated financial APIs with multi-factor authentication and PCI-DSS controls; wrote test suites covering critical transaction flows

Environment and Climate Change Canada **Toronto, ON**
Full Stack Developer *May 2017 - Jan 2020*

– Led WeatherCAN from discovery through launch, reaching 1M+ users within the first year

– Built XML/JSON data ingestion pipelines processing 50,000+ daily weather updates with automated testing and CI/CD

– Built Python and Node.js REST API services handling 10M+ monthly calls

University of Toronto **Toronto, ON**
Machine Learning Research Assistant (Internship) *Sep 2016 - Dec 2016*

– Trained machine learning models in Python and R, including neural networks and random walk models

– Generated real-world inferences from model outputs on the economic impacts of foreign trade policies

Education

University of Toronto **Toronto, ON**
Bachelor of Science, Computer Science & Statistical Machine Learning, Co-op *2014 - 2019*

– Coursework: Statistical Machine Learning, Neural Networks, Deep Learning, Natural Language Processing, Computer Vision, Statistical Inference, Multivariate Analysis

Technical Skills

iOS & Mobile: Swift, SwiftUI, UIKit, Objective-C, Core Data, CloudKit, MapKit, React Native

Languages: Swift, Python, Java, Objective-C, TypeScript, JavaScript, SQL, R

Backend & Data: Python (Django), Node.js (Express/NestJS), REST APIs, GraphQL, microservices, data ingestion pipelines

Databases: PostgreSQL, SQLite, MongoDB, Firebase

Frontend: React, Vue.js, HTML5, CSS3

Cloud & DevOps: AWS (infrastructure, APIs, web app hosting), Docker, GitHub Actions, CI/CD pipelines, Git, Postman

Testing: Unit & integration testing, TDD, automated test suites

Platforms & Integrations: Zendesk, Gorgias, HubSpot, Monday.com, Shopify, webhook & API orchestration

Projects

Goal Getter – iOS Habit Tracker – 1,000+ MAU – Paying Subscribers

– Shipped a solo iOS app with CloudKit sync across iPhone, iPad, and Apple Watch, and in-app purchases converting at 3%

Countries Quiz – Interactive Geography App – 500+ MAU

– Built custom MapKit rendering with 4 game modes and progressive difficulty
